26 September 1974

NOTE FOR: Director, Central Reference Service

Harry:

I really should not write you this note because, as you know, I consider you to be the principal "dirty picture" man in the Agency; however, I will give you a chance to repent and reform! Seriously, Harry, several people in recent weeks have called to my attention that our barber shop features as reading material only Playboy, Penthouse, et cetera. Is there any possibility that outdated periodicals of a less graphic and more intellectual type could be funneled down there from your Library operation. If so, there are those around who would consider it a contribution to the common good. Would appreciate anything you could do.
